

IDEOLOGICAL VIEWS OF YOUNG PEOPLE AGAINST EXTERNAL THREATS; PROBLEMS AND SOLUTIONS

Sharapova Sabokhat Djabbarovna
Gulistan State University. Doctor of Psychology (PhD)

Abstract: By the beginning of the 21st century, the interaction between the countries of the world has become so strong that it is safe to say that no country is fully protected from this process. Even countries that seek to distance themselves from international organizations and do not want to join them are not excluded from the process. Globalization is such a process that countries that claim to stay out of it are becoming more and more affected. Such involuntary effects often have negative consequences. Today's rapidly evolving globalization is taking on a new meaning in the spirituality of every nation, people, nation, or humanity. In the development of society, «just as every social phenomenon has its pros and cons, so does the process of globalization. But along with such achievements, we must not forget that globalization poses a spiritual threat to the national ideas, ideologies, beliefs and heritage of some peoples.

Keywords: countries of the world, interaction, globalization, social phenomenon, integration, foreign investment, capital and goods, modern communications, information technology, science, environmental disasters.

Идеологические взгляды молодежи на внешние угрозы; проблемы и пути их решения

Шарапова Сабохат Джаббаровна
Гулистанский государственный университет. Доктор психологических наук (PhD)

Аннотация: К началу 21 века взаимодействие между странами мира стало настолько сильным, что можно с уверенностью сказать, что ни одна страна не защищена полностью от этого процесса. Даже страны, которые стремятся дистанцироваться от международных организаций и не хотят к ним присоединиться, не исключены из этого процесса. Глобализация - это такой процесс, что страны, которые утверждают, что остаются в стороне от него, становятся все более и более затронутыми. Такие произвольные воздействия часто имеют негативные последствия. Сегодняшняя быстро развивающаяся глобализация приобретает новое значение в духовности каждой нации, народа, нация или человечество. В развитии общества «точно так же, как у каждого социального явления есть свои плюсы и минусы, так и у процесса глобализации. Но наряду с такими достижениями мы не должны забывать, что глобализация представляет духовную угрозу национальным идеям, идеологиям, верованиям и наследию некоторых народов.

Ключевые слова: страны мира, взаимодействие, глобализация, социальное явление, интеграция, иностранные инвестиции, капитал и товары, современные коммуникации, информационные технологии, наука, экологические катастрофы.

YOSHLARNING TASHQI TAHDIDLARGA MAFKURAVIY QARASHLARI; MUAMMOLAR VA ULARNI HAL QILISH YO'LLARI

Sharapova Sabokhat Djabbarovna
Guliston davlat universiteti. Psixologiya fanlari doktori (PhD)

Annotatsiya: 21 - asrning boshlariga kelib, dunyo mamlakatlari o'rtasidagi o'zaro munosabatlar shu qadar kuchli bo'ldiki, hech bir mamlakat bu jarayondan to'liq himoyalangan deb aytish mumkin. Hatto xalqaro tashkilotlardan uzoqlashishga intilayotgan va ularga qo'shilishni istamaydigan mamlakatlar ham bu jarayondan chetda qolmaydi. Globallashuv-bu shunday jarayonki, undan chetda qolaman deb

da'vo qiladigan mamlakatlar tobora ko'proq ta'sir ko'rsatmoqda. Bunday beixtiyor ta'sirlar ko'pincha salbiy oqibatlariga olib keladi. Bugungi jadal rivojlanayotgan globallashuv har bir millat, xalq, ma'naviyatda yangi ahamiyat kasb etmoqda. millat yoki insoniyat. Jamiyat rivojlanishida « har bir ijtimoiy hodisaning ijobiy va salbiy tomonlari bo'lgani kabi, globallashuv jarayoni ham shunday. Ammo bunday yutuqlar bilan bir qatorda, globallashuv ba'zi xalqlarning milliy g'oyalari, mafkuralari, e'tiqodlari va merosiga ma'naviy tahdid solishini unutmashimiz kerak.

Kalit so'zlar: dunyo mamlakatlari, o'zaro ta'sir, globallashuv, ijtimoiy hodisa, integratsiya, xorijiy investitsiyalar, kapital va tovarlar, zamonaviy aloqa, axborot texnologiyalari, fan, ekologik ofatlar.

Socio-economic development of humanity in today's globalization process has changed radically. As a result of these changes, there are a number of important and relevant effects the scope of which covers the world community, the future social of mankind there have been problems determining its development. These are the problems are called global problems of humanity and on the way to find their solution the goal is to gather the strength and efforts of all countries according to Peacekeeping and disarmament are the most important global problems universal importance, because if this problem is not solved, life on Earth and the future of civilization is inevitable. Humanity in the history, according to some data, more than 14 thousand wars took place in total and Unfortunately, there are military conflicts and conflicts in different regions of our planet is still happening. But globally, this problem is a total of 70 million It intensified in the 20th century, when two world wars took place in which many people died. Currently, the United States, the Russian Federation, Great Britain, France, China, India and Pakistan are officially recognized nuclear weapons by the world community are the owner countries. There are wars and military conflicts in different regions of the world is happening. Due to military actions and civil wars, some countries are humanitarian came to a disaster situation. This includes Syria, Iraq, Libya, Somalia, Afghanistan, South Sudan and other countries can be cited as an example. As a result of rapid changes in the information society, «in the 20th century acceleration of the globalization process and the formation of a global civilization its beginning changed the character of world ideologies. Their place the absence of a powerful ideology to suppress, and the change of geopolitical goals strengthened the negative impact of these ideas. In such conditions, his goal is clear defined, well aware of his needs and interests, has his own beliefs in a word, it is a nation that has formed its own national idea preserves the future and sets the perspective». The Uzbek nation has formed its own national idea that has been living for centuries on the basis of enriching the outlook of young people with advanced technologies, various influences based on self-awareness, respect for national values and aesthetic culture he is always ready to deliver to the future in his own way.

Today, the development of the world has reached such a level that now it is an ideological struggle, spiritual potential took the leading place. Various threats to human development fell under its influence, to compromise its security and stability, even its own threats aimed at derailing his life are increasing day by day no more weapons, but «thought against thought, idea against idea» it is possible to fight with. Ideological struggle within a society, a country continues both at the international and interstate level. Currently Political forces and movements seeking to expand their sphere of influence through ideological means are becoming increasingly tense. A certain nation, society, directed against the peace and stability of the state, political and constitutional aimed at weakening and disrupting the system, to the

safety of citizens and society threatening ideological aggression is intensifying. Do not engage in such aggression those who strike use any means to achieve their evil goals, people's religious and national feelings, socio-economic life they try to use their difficulties skillfully. Today the hearts and minds of certain sections of their population, especially young people to occupy themselves with an idea that suits them, i.e. destructive ideas, religious.

Extremism and malicious goals such as inculcating their ideas became clear to the people are going. These threats come from various destructive forces around the world is skillfully distributed that it multiplies through its attractive influence day by day he is dragging people into his trap. «Threat» means a person life activity, life in general, complicated and historical period social structure directed for a specific purpose, political of the state local, regional, regional social and historical situation can be understood. Of course it is destructive ideas will not fail to exert their influence everywhere. If we stand together with self-confidence, we are against this destructive idea. Influence on the human heart and mind in the ideological landscape of the world today. Ideological polygons that conduct and fight with various means activity is becoming more and more visible. At the current stage of development a very complicated and dangerous process is going on in the world. These are the world's political, changes in the ideological landscape, the rise to a new stage of development and this is a society that derails democratic development, which is a source of development with the emergence of ideological and ideological obstacles leading to its stability explained.

Our main goal in the fight against ideological threats is society raising the morale, first of all, the consciousness of the citizens and the national idea we must achieve deep absorption into the heart. In the population, especially young people formation of healthy beliefs in the generation, among them national and universal harmonious promotion of values is also important. In general, further increase of citizens' knowledge and thinking, legal culture. Any threats to us as long as we carry out the promotion work consistently can't risk it. That is why a great scholar has emerged from our country at this time in the process of studying the scientific and spiritual heritage of our ancestors, it is not only scientific goals, but also from the priority of the interests of spiritual education is necessary. It is necessary to reach such a level that our youth is the wealth left by our ancestors in addition to studying the heritage, it is also active in promoting them on a global scale let them participate. As a result of this, our youth have an infinite sense of pride will be further strengthened. It is known that the feeling of pride in one's country is human opens a wide path in the formation of high spirituality in the heart. Today we understand that it is up to each of us to fight against them it is our urgent task. Because ideological threats are known to the population strata, especially young people, in the direction they like to inculcate destructive ideas such as change, religious extremism, immorality. It looks like an attempt. Recent Internet hacks from the global network there are more and more people who are using it for nefarious purposes. As a result, to confusion introductory electronic publications and videos are widely distributed. Scammers use the Internet to lure young people into their traps is using. Identifying themselves as «close friends» or «guides» misleading young people from the right path. In fact, about their religion and sharia he has no knowledge at all, only from repeating what he memorized from the beginning they do not go beyond.

The modern world is full of complex ideological contradictions and ideologies. It is a time when landfills are becoming more powerful than nuclear landfills. In the world globalization, acceleration and intensification of information flow, universal

global processes related to technologies are accelerating. Such trying to expand its sphere of influence through ideological means political forces and movements are not absent. Aggressive nationalism and chauvinism, these are the ideologies of neo-fascism and fundamentalism, racism and religious extremism including. As a result, the world is increasingly fighting for the possession of human hearts and minds is getting stronger.

In general, all research scientists believe that global changes are cultural to peculiarities, especially to the upbringing of the young generation, their consciousness and they emphasize that it has an influence on the ideology. The brain of the young generation is still an example of unwritten white paper will be clean. What is written in it is what is entered appears. However, they have different opinions about the scope of this influence. It is known that in order to prevent any disease, first of all, there is flour in the human body immunity is generated. We also love our children for our motherland to educate in the spirit of loyalty to our history, the sacred religion of our ancestors, first of all, it is necessary to strengthen ideological immunity in their hearts and minds. Until a time when our young people deeply understand the national continuity, and at the same time, the world. Let the people who step in step with him grow up. That's why he's ignorant the prayers of the devotees and the ideas of strangers will have an impact on them can't. Imam Bukhari (810-870), «The nature of the child is Islamic (here «trustworthy»), it is up to parents and teachers to fill it with ideas depends».

In the process of globalization, the Internet is a new means of communication. Globalization in the process, people find the source they want on the Internet. Internet many can unite or separate, and also work for an aggressive purpose, that is, it is a weapon of ideological war, which is called «cyber terrorism» in science. In fact, globalization in the field of information is for humanity, the whole world for the interaction of people in the regions, science and cultural resources. It is a process that creates great opportunities for mastering. At the global level, it is necessary for humanity to compromise on some issues will come. One of them, in our opinion, is the pages that maintain terrorism on the Internet. It is a control-oriented cooperation. It is interesting to note that these web pages. The victim is not only young people, but also older people to the victim due to the incompleteness of his wealth and his tendency to destructive ideas are spinning.

In short, today the population is aware of ideological threats one layer, especially young people, in the direction they like to inculcate destructive ideas such as change, religious extremism, immorality. To live always alert, alert and vigilant against ideological threats a monologue about the cruel games of learning, complex and dangerous life and it is necessary to pay special attention to the formation of false ideas, for this a healthy way of life, respect for national and universal human values, it is necessary to further develop feelings of confidence in one's own strength and tomorrow. According to the imagination of others, globalization is not in the economic sphere. The religious sphere is preparing a great danger, because globalism and secular information. At the same time, it is combined with the propaganda of impiety. Again in the opinion of others, globalization harms the nation and national identity delivers Cultural, including religious values, lifestyle are also at risk remains. For scientists and politicians who are inclined towards this approach striving to preserve cultural identity is the main goal. Because now the internet the majority of those using the network are young people. Young people and it is the future of the nation and the state. It should be said that young people have a healthy outlook on globalization.

The time demands the development of a program aimed at development. To all of us it should be clear that wherever carelessness and indifference rule, there spirituality becomes the weakest and weakest point, and vice versa, where prudence and when enthusiasm reigns, spirituality becomes a powerful force. Today, in the international arena, various political forces have their own national and strategic the true nature and goals of the far-sighted policy to achieve the plans it is important to notice and understand in time.
